CLOSED CASE · R3

Tamarind Ridge Textiles Ltd

ZTRMV9WFWKY

Tamarind Ridge Textiles Ltd: a closed idea, May 2026 to Aug 2026

WHAT THIS TEACHES How a thesis that rested on one large order can break, and what the first sign looked like.

Written 29 May 2026 · Closed 17 Aug 2026 · Figures to 11 Sep 2026

What he expected

Expected Tamarind Ridge Textiles Ltd to do better than the Nifty 50 over 1 year.

HIS WORDS, SEALED 29 MAY 2026, 10:30 IST

> Tamarind Ridge makes cotton fabric for export. Its looms are full and its order book is growing faster than I think the market expects, so I expect it to do better than the Nifty 50 over a year. I would be wrong if the order book stops growing for two quarters.

Written on 29 May 2026. Fingerprint 6ccf5365627e10ececd99bdece094cffc10d37207004b2725e2700e1bfd354c4.

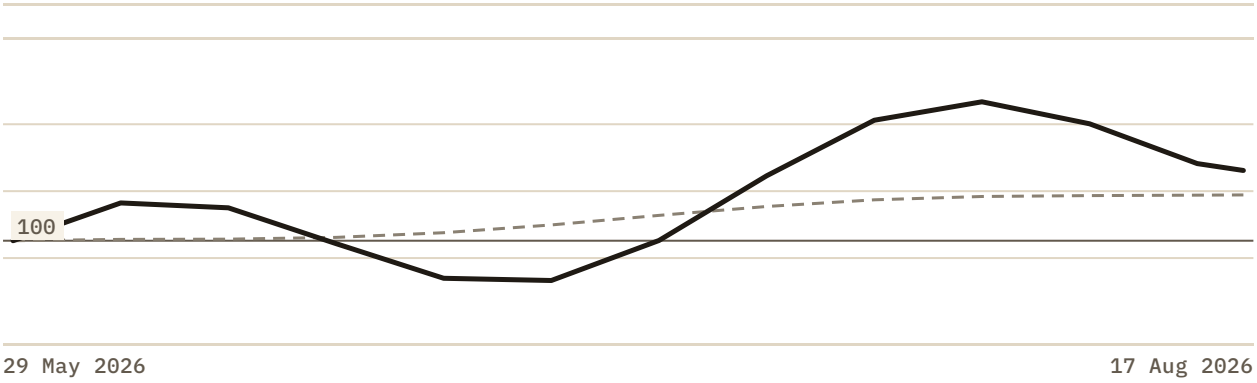
Changed the period to 6 months on 18 Jun 2026.

HIS WORDS, SEALED 18 JUN 2026, 10:30 IST

> Shortening the period to six months. The next two results will test the order book, and I would rather judge it then.

Written on 18 Jun 2026. Fingerprint b42ca1f079e1a24b4fdb27061f8f6fc8ffff15e93f9a759000e96a2c8fd8c2f8.

What happened



Closing prices, NSE. Rebased to 100 on 29 May 2026. Figures to 11 Sep 2026. Price only, dividends not included. A past case, not a view on the share today.

> Entry: NSE close of 29 May 2026. Exit: NSE close of 17 Aug 2026. 80 days from entry to exit.

Closed on 17 Aug 2026. His reason: thesis broken.

HIS WORDS, SEALED 17 AUG 2026, 10:30 IST

> Closing the idea. The order book fell for two quarters in a row, which is what I said would make me wrong.

> Written on 17 Aug 2026. Fingerprint 8e6f6bced57770d4801fb90e67e2f08c0071eacdf1e616767033c127230b2076.

What he learned

His call on his own process: flawed.

Kinds of mistake he named: timing.

HIS WORDS, SEALED 27 AUG 2026, 10:30 IST

> The thesis broke because I misread how long the big order would last. I was slow to act on the change; the signal was there in the second quarter.

> Written on 27 Aug 2026. Fingerprint f73c9245e632907284a4cdef1007d143e4fac7344d53d48c29c8ac2feafca709.

His call on his own process: flawed.

Kinds of mistake he named: timing, sizing.

HIS WORDS, SEALED 11 SEP 2026, 10:30 IST

> Looking again, the second lesson is about the size I would have held. I would have held less until the second quarter was in.

> Written on 11 Sep 2026. Fingerprint fa1df330e4c1ade986a679f5befac6fe6422c84ce1262baca90dab5b155543ed.

Looking back

> I wrote that two quarters of a falling order book would show I was wrong.
> It fell for two quarters, so the thesis was wrong.

How to check these entries

Each fingerprint is the SHA-256 of the fingerprint before it, one line break, and the sealed text below, in UTF-8, with nothing after it.

Opening entry, 29 May 2026
Change of period, 18 Jun 2026
Closing entry, 17 Aug 2026
Review, 27 Aug 2026
Review, 11 Sep 2026

This shows the text is the one the desk sealed at that place in its chain. It does not show when it was written: the public copy of the fingerprints is not switched on.
