VIEW

Aksh's view

His own words. Each figure opens the line it came from.

> Kaveri ships most of its pumps through about 1,900 dealers. Revenue reached ₹1,284 cr in FY26 `S1 p. 131`, up from ₹1,102 cr a year earlier.
>
> Gross margin held at 31.4% `S1 p. 140` even as steel costs rose. I read that as some pricing power: dealers kept ordering at list rates.
>
> The part I cannot explain yet is working capital. Receivable days rose again to 142 `S1 p. 152`, from 81 four years ago, and the order book grew faster than revenue `S1 p. 18`. If dealers are paying later, the margin may rest on longer credit.

TESTS

I would be wrong if

Three tests Aksh set himself. "Met" means his view is wrong.

● Met 0 ◑ Watching 1 ○ Not met 1 ◌ No data 1

"Met" means his view is wrong.

T1 Receivable days stay above 150 for two straight years.

142 days

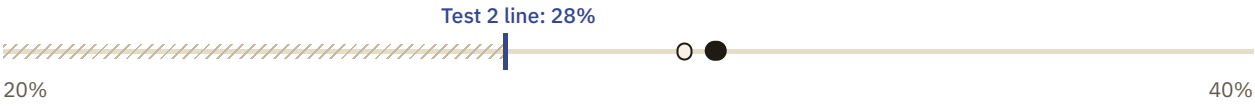

Data to 31 Mar 2026
checked 20 Aug 2026

◑ Watching

T2 Gross margin falls below 28% in a full year.

31.4%

Data to 31 Mar 2026
checked 20 Aug 2026

○ Not met

T3 The dealer count shrinks for two straight years.
